QuadBee - Defend Your Country!

Slava Ukraini!

All funds gained from donations and affiliate commission will be going to Ukraine.

This listing is for the printable model/CAD files. The full project source of truth lives on GitHub, where the build resources can be updated without keeping PDFs, code archives, or documentation bundles attached to the 3D-printing sites.

Recommended tools and supplies

Useful shop supplies for this build:

- Soldering iron TS101: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Electric precision screwdriver: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Allen key set: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Torx key set: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Wire stripper: [Amazon](#) / [regional option](#)
- Wire cutter: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Heat insert press tool: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Crimp tool: [AliExpress](#) / [Amazon](#) / [regional option](#)
- Filament: PETG/ASA/ABS/PC for structural parts, PLA for cosmetic parts, and TPU where the design calls for flexible feet/tires.

What is included here

- Printable model files
- CAD/source model files where available
- Images and platform-specific print/model metadata

For ordering, electronics, firmware, wiring, and assembly details, use the GitHub links above as the current source of truth.
