This is a collection of simple to print **3D Christmas ornaments**, including snowflakes, stars, bells, trees and many more. The set contains **over 15 original designs** created by me in Blender to ensure clean proportions, sharp details and reliable printability.

Each ornament is lightweight, filament friendly and very fast to print. Most models weigh **around 3 g** and finish in about **15 to 20 minutes**. They work well with any filament, including PLA, PETG and ABS.

The models shown in the photos were printed using PLA Sunlu Silk Light Gold, Tecbears PLA+ White and PLA Sunlu Red.

These ornaments are perfect for decorating your Christmas tree, adding to festive wreaths or creating personalized DIY gifts. They are ideal for fast batch printing and seasonal projects.

Important note: You may not sell prints made from this model without a license. You can get yours on my [Patreon](#).
