Bring some rattling fun to your desk, shelf, or backpack with the **Jolly Skeleton!**

Designed in a simplified, cartoonish style, this adorable skeleton features a big round head, plump little hands, and boot-like feet.

The head and jaw are separated by a hidden spring — when you gently pull, the mouth opens and snaps back playfully.

Arms, legs, and ribs are connected with loop joints that allow the skeleton to swing, shake, and “rattle his bones” in a fun way.

You can easily add a small loop on top of the skull to turn this model into a keychain or hanging decoration. It works great as a desk toy, collectible, or gift charm.

All parts are designed for flat printing with full bottom support, and the walls are about 2 mm thick to ensure strength and print reliability. No supports are required, and assembly is quick and intuitive.

Keep in mind that the flexibility and brittleness of the model may vary depending on the filament manufacturer, plastic type, and even color

Key Features:

Rattles his bones – lively, moving joints make a satisfying sound

Wobbles with joy – moves freely and always returns to shape

Springs back – ribs and jaw designed with flexible connection points

Double the fun – twice the charm of a static figure

Print-friendly design – easy to print and assemble without supports

Optional loop – add a ring or hook to turn it into a keychain or hanging toy
