Summary

A super fast and easy print but oh so useful and nice. Also great as a gift everyone can use.

0.34 hrs	1 pcs	0.15 mm	0.40 mm	PLA	2 g	Prusa MINI / MINI+

Inspired by the toothbrush-chaos in most of the shared appartements I know, I wanted to design something that would solve that issue in the most simple and effective way possible while also being space saving and elegant to look at.

It is endlessly scalable: From single appartements to huge families - just add another hanger to the wall.

Comes in four variants: two different sizes and two different mounting methods

„standard“ - 7mm width: fits most toothbrushes incl. sonicare toothbrush heads

„wide“ - 10mm width : for wider toothbrushes e.g. made out of wood/ bamboo

„adhesive“ - for mounting with the use of strong double sided tape or something similar

„screw“ - for screwing it firmly to the wall

I printed with 0.15mm layer height and 15% gyroid infill - only 20min but super strong!
