The **Panavia Tornado** saw service in the RAF from 1979 right through to 2019 before it was totally phased out to make way for the **Eurofighter Typhoon**

I grew up seeing this aircraft flying overhead in pairs and low through the Scottish glens, a childhood favourite!

I'd been wanting to do this one for a long time, but couldn't bring myself to until I found a reasonable way to incorporate the variable sweep wings!

Mildly inspired by the **Articulated F14 Jet by Agepbiz** :)

Included is the standard fit, same as the others, but also a tighter one as I know some of you find them too loose! For those uninterested in the card

format, there are frameless variants included, alongside the individual part files!

Edit: Added variant with the text 'TORNADO F3' as per a request!

Makes greatly appreciated, always glad to see them! Happy Printing!

Interested in selling? All files are marked as non-commercial along with any remixes created from them.

If you are interested in selling physical prints of my models anywhere, be it online or offline, you can obtain a **sales license** when subscribed to Tier 3 of my **Ko-Fi memberships**!

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

No

Supports:

No

Resolution:

0.2

Infill:

100%

Filament: Eryone PLA White

Notes:

It's a nice snap fit for me and my printer, results may vary! To tweak the tightness, simply increase or decrease the Z height in your slicer, otherwise a little glue can go a long way!

No tools required, however I would recommend some side-cutters and a small blade for clean-up :)
