Summary

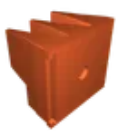

Modular wrench holders with a hole for a 10mmx3mm magnet in the bottom.

Hobby & Makers > Organizers

Tags: organizer wrench holder toolbox garage

Wrench holders slide together. I included pieces with 3 peaks and 1 peak if you need different lengths. There are also front and back pieces that only have the attachment points on one side. The magnets I used were 10x3mm magnets from amazon (they measured at 2.8mm thick though).
