3 support-free skeletons. All dead, just animated by evil magic. **EDIT** There is a modified version of halberdier with reinforced leg.

Suitable for 28mm tabletop games.

Created so that they do not need any supports and print well on a cheap FDM 3d printer like the Ender 3.

There are variants with square and round bases.

IMPORTANT If you get a lot of stringing because of the slim parts, reduce your nozzle temperature to 190 (for PLA).

NOTE The full pack of 8 different skellies is [available on my Patreon](#).

Let me know how it printed for you in the comments and makes!

If you enjoy it, buy me a drink once in a while and support more supportless models on Patreon!: <https://www.patreon.com/BriteMinis>
