Summary

Grinch Style Christmas Bowl with Removable Santa Hat

[Seasonal designs](#) > [Winter & Christmas & New Year's](#)

Tags: [christmas](#) [bowl](#) [grinch](#)

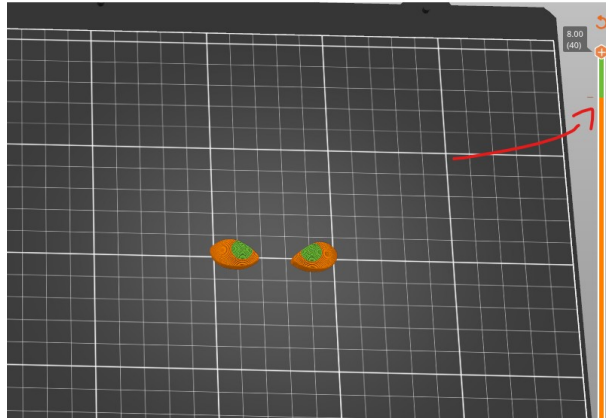

A bowl shaped like the Grinch's head with a removable Santa hat.

I created this model inspired by this photo which I found on internet.

All parts can be printed without using MMU

You can also play around with the eyes in this model by changing the position and size of the pupils. To adjust the pupils, simply rotate the entire eyeball slightly and then change the filament at the correct layer in as shown in the image.

After printing, all parts should be glued together. Only the eyes can be pressed in, as they fit quite tightly.

Each element was printed in the position you open in the files. I used organic supports, 0.2 mm layers, PLA.
