Summary

Prints fast, no supports, no filament swaps!

[Seasonal designs](#) > [Winter & Christmas & New Year's](#)

Tags: [christmas](#) [fidget](#) [ornament](#) [easyprint](#) [holiday](#)
[passthrough](#)

Christmas ornament or holiday fidget toy. There is a hole in the top to feed a string or ornament hook to hang from your tree just download the "snappable" version. In this version the two pieces snap together so it can hang from a Christmas Tree.

fully designed by hand in fusion 360

Large - 75MM

Med - 55MM

I really enjoyed making this one, if this is something that interests you make sure to follow because I can't wait to make more!

Model in photos printed with Matte Black/White PLA and Multi color Silk PLA with 0.2mm layer height and 2 walls

printed with 10% infill

There is enough "wiggle room" between the pieces that you could probably print this at 50% size and still have smooth sliding, I gave 0.5mm gap on each side.

Enjoy and leave me a like! <3
