[stitch](#)

As requested the flexi stitch fan art, built using the new link system - this fun little fidget is small, flexible and full of color

Fully print in place with no brim or support required, he's also small enough to fit on any FDM printer and in the smallest hands  
Includes fully painted profile that's optimised and ready for your printer

If printing using the STL file I recommend 0.3 walls for higher detail

I also recommend gyroid infill and z-hop for printers with lower bed adhesion (enabled by default in the provided print profiles)

Have fun printing
