It's that time of year that my girls do their cookie weekend. They make dozens of different cookies. I saw several ads for funnels. I thought I would design/make them one. They have Kitchen Aid K45SS and a Professional 5 Plus mixers.

FDM 3D prints layers can trap bacteria. If you plan to use the funnel for liquids, you should **post-process with food-safe epoxy**

I printed the large funnel on my Prusa XL with the 0.6mm nozzle. I used supports, but it only is used on the attachment dowel. My Prusa CoreOne had problems printing the high slope unsupported area with the 0.4mm nozzle. I made a second smaller funnel that had less slope.

Things I used:

- Certified Food Grade PETG Anti-Bacterial 3D Printer Filament (<https://amzn.to/494zl8n>)

- Crystal Clear Epoxy Resin Coating for 3D Printed PLA, PVC, PET - FDA Compliant (<https://amzn.to/4qor8Zk>)
- KitchenAid Classic Series 4.5 Quart Tilt-Head Stand Mixer K45SS (<https://amzn.to/4b6jVZ8>)
- KitchenAid 7 Quart Bowl-Lift Stand Mixer (<https://amzn.to/4j4Hxzn>)

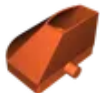

Funnels available:

- A flour funnel by Dan Rogers (<https://www.printables.com/model/1482389-flour-funnel-for-kitchenaid-stand-mixer>)
- Flour Funnel for Kitchen Aid Mixer Attachment, Mess-Free Flour Funnel for 4.5-5 Qt Tilt-Head KitchenAid Stand Mixer (<https://amzn.to/49bOcn8>)
- 2Pcs Flour Funnel, Silicone Food-Grade | for KitchenAid Stand Mixer | Leak-Proof Large Capacity, Collapsible Design (<https://amzn.to/4aqJ7tb>)
- Countess Flour Funnel™ - Stand Mixer Attachment by The Cookie Countess (<https://amzn.to/4aXv1j5>)
