Print Description – Filament Spool Clip

This **filament clip** is designed to securely hold the loose end of your filament directly on the spool.

It prevents filament from unwinding, tangling, or snapping back into the spool during storage.

The clip simply snaps onto the **edge of the filament spool** and gently holds the filament in place without bending it too sharply.

Features

- Keeps filament ends **secure and organized**
- Prevents **unwinding & tangles**
- Easy **snap-on design**
- Compatible with most **standard filament spools**
- Gentle filament guidance (no sharp bends)
- Minimal, functional design

Recommended Print Settings

- **Material:** PLA, PETG or ABS
- **Layer height:** 0.2 mm
- **Infill:** 100% or 30–50% (for extra stiffness)
- **Walls:** 3–4
- **Supports:** No
- **Brim/Raft:** Not required

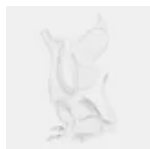

Notes

- Designed for typical **1.75 mm filament**
- Works with most common spool rim thicknesses
- Slight flexibility helps with clipping on/off
- Print orientation as provided for best strength
