Perfect for Holding your 12oz beverage in a Trashcan like receptacle.

Included files • Step file for reference • Can Body • Lid • Wheel (print 2)

Prints in 4 pieces (2 wheels, the can, and lid) and 1.75mm filament functions as the hinge and axle. For the axel to retain the wheel I melted a bit of the filament with a soldering iron and glued in place.

No supports needed for can body Lid does need support. 10% infill is fine
