Summary

This is an adapter to hang the Meanwell LRS-200-24 onto the DIN rail of a RatRig V-Core3 400mm

[3D Printers](#) > [3D Printers - Upgrades](#)

This is an adapter to hang the Meanwell LRS-200-24 onto the DIN rail of a RatRig V-Core3 400mm. It should be printed twice, one mirrored (see picture). It doesn't require supports.

It is designed for the DIN rail distance (137.5mm) between of the DIN rails mounted on the back of a 400mm V-Core3! It will not fit other dimensions of VC3.

It was built around the M4 countersunk screws I had available, 12mm long.

I'm not gonna ask for a coffee, but please make sure you give me a like if you find this model useful.

This remix is based on

DIN Rail Bracket
