[3D Printers](#) > [Accessories](#)

Remix of lightninglord88 fan duct (<https://www.thingiverse.com/thing:4816138>) with the part than covers the manual feed gear removed (crudely) in maya. STL export broken for me so its an OBJ but should import fine.

Cura was fusing the presupport that is included around the airoutlet so I include both with and without presupport.

Print Settings

Rafts:

No

Supports:

Yes

Resolution:

0.2

Infill:

50
