TUSH style spool roller for Eibos new filament dryer, by default it only has a center spool holder than was not allowing my spool to spin smoothly. Tested with SUNLU style spools only.

WILL NOT WORK WORK WITH SPOOLS WITH A SMALL INNER DIAMETER SMALLER THAN 70MM ISH OR OUTER DIAMETER LARGER THAN 195MM ISH DUE TO LIMITED SPACE IN THE DRYER BOX.

I didn't have any smaller bearings other than 608 but maybe a remix with smaller bearing in the future will improve spool compatibility.

Print 2 of each file in ABS, ASA, PETG or any high temp resistant filament.

Other parts needed

4x 608 bearings

4x M3x12mm bolt (Longer works but will stick out of bolt side of course)

4x M3 Nut

Print Settings

Printer:

Biqu Bx

Rafts:

No

Supports:

Doesn't Matter

Resolution:

0.2

Infill:

20-30%

Filament:
