I purchased two cheap tripods to hold up a bar, from which grow lights are suspended to provide light for my hydroponic basil and lettuce crops. This adapter allows you to hold up a 1" or smaller bar, rod, or pole on top of a standard tripod meant for photography. One 1/4-20 nut is required (can be found at Home Depot or Lowes). It is press-fit into the bottom of the adapter after printing is complete.
