I was looking for a phone tripod stand and there was nothing usable for a case with a popsocket so I remixed this. (Make sure your popsocket is centered on your phone for it to stay level, it won't work if mounted near the edge.)

I used a few supports on both pieces and it printed very easy.

If you need to make the tripod tighter, simply add a small piece of paper inside the tripod stand, or scale it down slightly before printing.
