Tags: [octopus](#) [coolingfan](#) [bigtreotech](#) [btt](#)

---

Holder for 80mm fans to cool the BigTreeTech Octopus, especially the stepper drivers.

The fans can be moved to the side so you can still reach the board and plugin something or change a jumper without disassembling the fans.

Prints in place including the hinge. Then print two times the arms. No Supports needed.

Please do better cable management than me.
