This is a simple mount to attach Bigtree Tech (BIQU) SKR 1.1 pro to the Anycubic Kossel Linear Plus or other 2020 extrusion based printers

Fix board with M3x5 or similar. Screw directly into plastic. Use two M3 hammernuts and M3x8 screws for attaching mount to the 2020 extrusion.

Due to the board design, putting in the micro SD card is pretty fiddely! I highly recommend a SD-card extender.

Another problem due to board design is attaching Fan0-Fan2 cables. I recommend to screw these in before you fix the board on the mount!

Any suggestions, please feel free to contact me in the comments section.

OpenSCAD file is attached for easy customizing.

Have fun!
