Summary

There is a ceiling hook but you need to prettify it, this one might be the right approach.

Tags: [hook](#) [ceilingmount](#) [ceilinghook](#) [ceilinghanger](#) [rosetta](#)

The hook-assembly is made of 3 parts: M30-adapter, decorative rosette and the hook. The hook holds a knotted rope of about 15 mm in diameter with a decoration attached.

The M30-adapter mounts to a ceiling mounted clamp (or hooks of that size) of about 15 mm width, and 13 mm height. The rosette is screwed onto the adapter part which shall come under tension and the thread becomes stabilized at the ceiling. Finally the hook is screwed onto that.

The hook needs to be printed with supports, the other parts do not need supports. The threaded elements should be printed with 0,15 mm layer height.
