updated 21. 3. 2022 | published 20. 3. 2022

Summary

These are soft jaws for your 200mm vise. The magnets I used are 8mm in diameter and are 3mm thick.

You have to mirror the jaw for a proper alignment of the 45° spacing. You have to glue the magnets in place. If you have any requests please let me know in the comments or via private message. Please post your make. Thank you.
