DeWalt DCW600 holder in carrying case. I was looking for a suitable case for the Dewalt DCW600 milling machine. The original case for the DCW604 seemed too big to me, so I decided to modify the classic DeWalt case from the cordless drill directly for my milling machine.

I started by carving and breaking all the plastic boundaries inside the carrying case that were adapted to hold the cordless drill and accessories. I placed the milling machine and accessories in an empty carrying case and designed holders for that. I glued all the holders to the carrying case with double-sided foam tape. I make everything I created available, maybe it will come in handy.
