updated 20. 3. 2022 | published 20. 3. 2022

Summary

These control horns are loosely based on Flite Test's wooden control horns.

Tags: [control](#) [horn](#) [servo](#) [pushrod](#)

Originally uploaded in 2015 to another sharing site, this design has been downloaded 6000+ times. I originally printed in ABS, but PETG or PLA+ should also work for the structural integrity needed. This is based on the original Flite Test wooden laser cut arms.

Instructions- Print, glue in place.
