## Summary

DiceTower

[Toys & Games](#) > [Board Games](#)

Tags: [tower](#) [castle](#) [dicetower](#) [dice](#) [kosci](#) [wieza](#) [twer](#)

Dice Tower does **not require any supports**.

Please scale the model according to your dices:

- **85%** - OK for all dices
- **75%** - Can be not ok for D20 dices (other than d20 - ok)

Print both files and after that add four 5mm neodymian magnets in the marked places and glue it (CA glue would be ok).

Remember about the **magnets polarity!**

After that you can disassembly the tower after game! **One-piece-verison version added** also, so if you would like to have the Tower in one piece, please choose that version - same settings for that.

Printed with PLA, no supports, 10% gyro infill, 0.4 nozzle, 0.2 layer height.

Remixed model from Thingiverse by hithwork.

Regards and happy printing!

You like it? You can buy me a coffee ☺
