Summary

A minimalist approach to displaying your GameBoy carts

[Gadgets](#) > [Video Games](#)

Simple and small print which can easily, and with a minimalist design, show off your loose cart collection!

The purpose was to make something which doesn't stick out when displayed in a collection (see last image, I think that succeeded quite well). The focus piece in my opinion is the cart, not the print ;)

Update 3/21/2022

Added a "3x" version to show off your Trilogy collections! (Pokemon, Mario/Wario, Donkey Kong, etc)

Update 6/17/2022

added a slightly smaller version of the Trilogy stand (GB-Cart_MinimalDisplay_small_3x.stl), to allow it to fit on 15x15cm printers.

Update 8/3/2022

Added a new minimalist variant that can hold the clamshell protective case (single only).

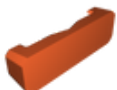

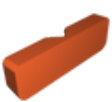

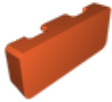

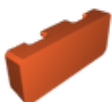

Update 9/6/2022

Clamshell variant added for original clamshells (which happen to be slightly thicker than modern ones from Ali). Additionally I've added a small display stand for loose GBA carts.

Update 9/13/2023

Added Trilogy stand for GBA as well
