!!please create your own gcode directly from the stl files!!

The Hexanger is used to hang a small sorting box from walls or be used as a hook for jackets, shirts hoodies or other things

The design encompasses hexagons, because 'Hexagons are the Bestagons' ~CGP Grey, as well as a smooth curved structure for structural integrity of the hook.

No glue, screws or similar used for assembly (unless you screw it to a wall; the wall piece has indentations for 2 M3 screws you can use in that case)

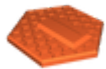

Note; this is a small print(!); so best done with sls or similar for good surface finish and a nice look, or scaled up for easier printing on a fdm machine

The Hexorter was designed as a storage and sorting place for smd components.
