A wall-mounted mallet holder that uses simple design to make the mallet stay in place, and the handle easy to grab! ~3mm screws should be used to mount it to the wall.

The print is currently sized to accept a mallet with the width of 80mm; please resize the STL in your slicer to fit your tool. There's also a Fusion 360 file, if you need to make amendments.

### PRINT INSTRUCTIONS

Just print - no supports or brim needed.

Printed with Prusament PLA

## VERSION HISTORY

- 20220320: Original Version
- 20220321: Version that's a bit more aesthetically pleasing, plus text
- 20220329: Put the holder on a diet, it's less chunky - and quicker to print; also made a recess to better "sit" tools in the holder
