Hi There, if you plan on downloading this model please consider leaving a like, posting a make, leaving a review, or even a donation. Thank You!

This is a ApeCoin Coaster model printed using the MMU2s with a texture powder coated steel sheet. I included the STL files, a 3mf file, and a gcode file. The STL files are labeled by color and they are oriented to be printed face down on a powder coated sheet for best results.

Share picture if you print one!
