Super fast Easter Card - different sizes
If you like it --> press like it :-)

Easter card in different sizes and with/without frame. Take care of the orientation at the model with frame, it is flat on one side and only half of the thickness.

You can finetune with the scale at thickness to make it fit tight. For me it worked fine at 100%.

The small one will print within 5 minutes!

The "letter" version will fit to a standard letter.

The x10 version is for huge bed size 300x300.

Update 08.04.2023: added a picture with the preassembly steps. Build like on the picture and then make the final assembly.

Would be happy to see your makes!

Printer Brand: Creality

Printer: CR10-V2

Rafts: No

Supports: No

Resolution: 0.2

Infill: 10% to 100 %

Printed: PETG/PLA

Weight: approx. <1g to 125g@10% infill
