This is a remix of Armatures design (Thing: 4819929).

They had already designed what seems to be a perfect replacement for the official iFlight gopro mount for the Chimera 7. The only issue I had is it didn't feature a countersunk hole for a nut, so that's what I've done here.

This is a GoPro mount for the iFlight Chimera 7 FPV drone with space to slot a nut into the mount itself.
