This is a phone holder designed for the One+ 3 Mobile phone with a slim case on, but will hold anything approx 77.4mm wide and 7mm deep..

NOTE: This is NOT a stand alone phone holder but is designed to work with the Brodit mount system. I had previously owned a Samsung S5 and bought one of these (<http://linkowl.net/d6c9>) to hold it in my car. This model is a replacement for the part of this kit that holds the phone.
