This is a simple stand for user Emmett's Three Gear hearts (<http://www.thingiverse.com/thing:243278>).

I've created one for each of the three different gear ratios he made as I think they are slightly different shapes.

You'll notice there is a logo extruded from inside the recess where the heart sits, This locks into the logo which is inherent in Emmetts models.

I hope you enjoy printing and using my design. To help me keep designing and uploading more things, as well as continue to run my YouTube channel (www.youtube.com/c/3drevolution), please consider making a small donation to me via PayPal: www.paypal.me/JoshForwood

Thank you!
