This is the model of a half sphere. I have worked the segments and after applying some modifiers to the model. I have finally converted it to wireframe and then give the walls some thickness.

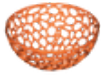

My goal was to print at the maximum size that the printer allowed, but not having much patience or time I decided to print it in 20 centimeters of diameter to test this model without supports in a standard quality.

This model is part of my brand [MO-design.studio](#) who brings stl files by suscription.

If you found this model useful, please donate what you think it is worth to my paypal.me. Help me cover the time of design. <https://paypal.me/edoesainebank>

Thanks, Enjoy!
