As hinted in my first creation page (<http://www.thingiverse.com/thing:3744655> and which I will now call "First Base V2") I have made a version that has a larger footprint, and allows the Valve Index controllers to be inserted while in a fairly natural, hand-held position. Some may prefer it in the way it displays the controllers in a butterfly type position as well.

See my prior page for information on the cables. The logos are all available here.

I present to you the Second Base: "The Boomerang BCT"
