Summary

Clothes peg for your DIY laundry

0.83 hrs

2 pcs

0.30 mm
0.20 mm

0.40 mm

PLA
PET

6 g

Prusa
MK3/S/S+

[Household](#) > [Other House Equipment](#)

Tags: [peg](#) [clothes](#) [pegs](#) [clothespeg](#)

A soft edition of [Tvorim3D design](#).

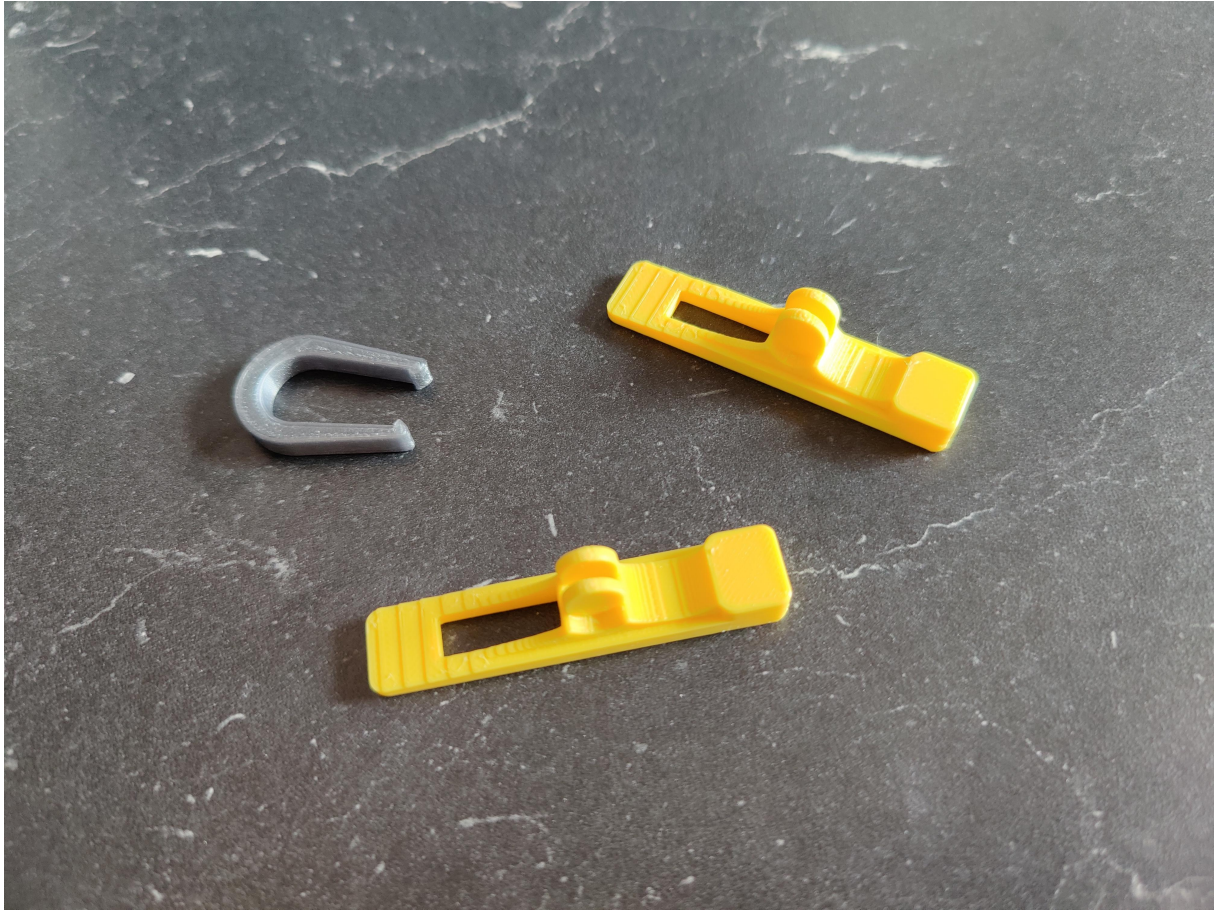

There are a couple of clothing items that are delicate, and when used with regular pegs they can wrinkle, for those items, a soft peg is ideal.

Printing

The two parts can be printed in different materials.

- Spring - is the most important part, needs to be strong, recommended PETG at 80% infill, 0.3mm layer height.
- Peg - doesn't need to be as strong but needs better resolution, can be printed in PLA, 15% infill, 0.2mm layer height

Assembly

↳ Print all necessary parts (2 peg parts + 1 spring)

↳ Join both peg parts

↳ Insert the peg spring from the back

↳ Push until you hear a click
