I really like the IKEA ALEX "ÅRRANGÖR" system from BritishLibrary. After getting my Revo, I needed a nice place to store the spare nozzles in my 3D printer drawer.

For this, I remixed the 65mm 1x2u unit to store all four nozzels with markings. Stacking is still possible. Alternatively, the unit can be used at its own.

The print was made with Prusament Galaxy Black and Signal White PETG. Reading the nozzle size is now very easy ;)

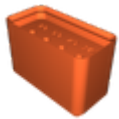

This remix is based on

IKEA ALEX "ÅRRANGÖR" - Organisation System for ALEX desk drawers

by BritishLibrary
