Tags: [orbiterextruder](#) [phaetusdragon](#) [sherpamini](#) [tronxy](#)
[x5s](#) [rapido](#) [volcano](#) [dragonflyhotend](#) [phaetusdragonflybms](#)

Lightweight mounting for Phaetus hotend (and clones) with sherpa mini, orbiter 1.5 or 2.0 extruders. Integrated 5015 blower parts cooling duct, 40mm heatsink fan duct, and BLtouch mount.

Edit 16/05/22: Added dragon volcano version

Edit 18/05/22: Volcano version also compatible with the new Rapido hotend in HF form, UHF not yet supported.

Edit 19/05/22: Added Dragonfly BMS versions
