Rafts:

No

Supports:

No

Resolution:

0.24

Infill:

None

Notes:

Designed for 0.4mm nozzles but you will probably be able to use any other size as well.

Print standing up to prevent the inner gap from closing up. You can scale it up a little bit if your fit is too snug, heating up the blade prior to the first insertion is another easy fix.

This is a tiny print, using just under 2g of filament and taking about 15min.
