Summary

A repurposing of Obi's Numbered PTFE Beads rescaled for 8mm beer line to identify which beer line for which tap

[Household](#) > [Kitchen](#)

Tags: [beer](#) [kegerator](#)

This remix is a rescaling of Obi's Numbered PTFE Beads to fit 8mm beer lines, so you know which beer line is for which tap in a kegerator. I have posted this as an idea on how this model can be used for another application. I have only scaled Obi's model to fit 8mm beer lines. Obi's model is excellent and can be used for other applications. I have made this post for people who are searching for models to use with their kegerator.

This remix is based on

Numbered PTFE Beads
