Summary

Mid range that makes the tilt seem floppy. Very straight flying when thrown upside down. Does not require supports.

Tags: [disc](#) [discgolf](#) [frisbee](#) [overstable](#)

Flat top beefcake. Something between a zone and a justice when thrown backhand. Only tested the flight with 75% infill with PETG. This print is best suited for a durable material. After printing with PETG it cracked relatively easily. TPU seems to be a good fit for a print like this however you're looking at a day of printing.
