Summary

A generator for bandsaw throat plates

[Hobby & Makers](#) > [Tools](#)

Tags: [plate](#) [bandsaw](#) [zero](#) [dustcollection](#) [clearance](#)
[zeroclearance](#)

The included .scad will generate a bandsaw throat plate for just about any bandsaw. By default it generates one with dust collection holes for a JET bandsaw (part #135010, STLs included) but it's super easy to modify to fit just about any bandsaw. Whether it has studs or notches, dust collection or no dust collection, etc. You can change just about anything via a few simple parameters.

There's even parameters for adding optional (fun) text to the final part
