Hello,

Here's a remix from the Wiha small screwdriver holder from Colorfabb on Thingiverse (<https://www.thingiverse.com/thing:1487220>). The holder is made to hold 6 PicoFinish HEX screwdrivers from Wiha. The original design had two holes to attach another holder for the Precision ESD series. As I don't have those, I decided to delete those ugly holes.

You'll need:

- 5 M3 nylock nuts (normal nuts will be totally fine)
- 5 M3x14 screws

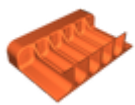

Printed on a Prusa Mini + in Groovy Gold PLA and black PLA

I shared the 3MF, STL, and Solidworks 2021 files.
