Summary

Printed in translucent PLA this holder can replace the broken cover of the trunk light of an Opel Astra H.

Maybe this fits other older cars, just try it. I can only say that it fits the Opel Astra H from 2007.

Print in translucent filament.

There is no need for supports, because the overhangs are small enough.

You will have to transfer the metal parts from the old part over. They will stay in place by press fit.

I printed it in 0.2mm and translucent PLA and even though it looks opaque it still lets enough light pass.
