[warboys](#)

The Warboys symbol from Mad Max Fury Road in refrigerator magnet form. Includes an internal space for a 18mm diameter, 5mm thick magnet. I'm including the Fusion file if you want to change the magnet pocket dimensions (there are parameters for the magnet diameter and thickness as well as clearance and minimum vertical wall thickness).

Printing

I printed it in PLA on a MK3S with an 0.4mm nozzle at 0.2mm layer height. No supports or anything other than default settings. The included g-code has a color change / pause command just before the pocket for the

magnet is covered. Once the printer pauses you can place the magnet then resume printing, sealing the magnet inside.
