The ring on the band of the watch fitbit surge breaks off quickly and the band becomes blah. I have replaced the band many times and the ring is always the first thing to break.

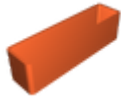

I made it soft by making it only 2 layers thin (0.6mm) walled. The picture is made of PLA, but PETG might be softer and better.

They are small and quick to print so you can try them out.

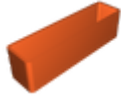

It will fit any watch band that is 28mm wide and 3mm thick.
Of course, you can print it in any color you like.
