This is a recreation of the wirehousing for sennheiser 6x0 series, though this was done on a 58x. I designed it to work with any drivers though if your driver is less than 44mm in total diameter you will need to design a ring to keep the driver in place, feel free to remix this and upload it if you do.

If you do what I did with the ksc75 driver, remove the driver grill completely before installing or it will sound like ass.

### Print Settings

#### Printer Brand:

Creality

#### Printer:

Ender 3 Pro

**Rafts:**

No

**Supports:**

Yes

**Resolution:**

200

**Infill:**

20

**Filament:** eSun PLA+ Black

**Notes:**

Printed with tree supports on BED ONLY. the fit for the plug is tight so if any support is left behind you will need to cut it out.

Category: Audio
