Summary

This is a cover that can be pressed into a T-25 screw to cover it.

Tags: [cover](#) [torx](#)

I wanted something to cover up the tan torx screws I used for mounting my shelf but was unable to find anything existing already. This was designed and tested with [Deckmate T-25 screws](#). I'm sure it can be improved but printing with supports was very easy as they were simple to remove. I found printing with the pin down (like an umbrella) was the best, so far at least.

- Printed in PLA
- 0.2mm layer height
- 20% infill
- Support required
