### Summary

2 Piece side trays for storage, rubbish and general "Cool look"

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [tray](#) [prusai3mk3](#) [rubbishbin](#)

Side trays for tools, stringy bits of filaments, spare parts etc. 2 Piece design allows for minimal support material and colour modifications of your choice.

- PETG Recommended, I used prusentment orange for OEM appearance
- No supports required on upper. Lower only requires small amount for overhang in extrusion clamp
- Stays in place with optional 20mm M3 fasteners (2x per tray)
- Some additional tidy up may be required in 6mm holes

### Model files

**traylowerold.stl**

☐ Older version for extra tight fit on 30mm extrusion

**trayupper.stl**

**traylowerupdatedextaclearance.stl**

☐ Newer version with .5mm extra clearance for easier install
