This is a trigger spacer for the High Tower Armory stock kit for a Ruger 10/22. Normally, the HTA trigger would have a lot of travel before it touched the real trigger. With this spacer, it greatly reduces the slop in between the fake and real trigger.

When testing it, make sure the trigger resets reliably, as some of my previous attempts with this spacer had my 90/22 trigger resetting only about 60% of the time.
